

Modular Staging

Set the Stage

Compact, portable, and customizable, our staging is big enough for large bands, DJs, and your favorite Karaoke Jam night yet small enough for more intimate events. Regardless of your event type, we have the perfect staging for you.

Stage Shape and Size

Create any size stage needed with our new modular staging. Size and shapes such as square, triangle and quarter round platforms allow us to create virtually any size stage. Shapes such as circles, y-configurations, catwalks or any other dimension that you may need.

Accessibility

Smart equipment and wheel chair ramps can be used in almost any available space and any staging installation. The same ramp can also be adjusted to use with different height stages.

Stage Height:

8", 16", 24" and 32" risers (legs) are available, so the staging height can be changed as needed. Multiple risers can be stacked on top of each other (no more than 2 risers high) and create even more height combinations.

Stage Backdrops.
We have you covered

NOTE: All of our stage kit rentals include platforms, risers (legs), skirting and all the necessary hardware for stage building. Delivery, set up, break down included.
